SUBJECT INDEX

Compiled by Judith Ockenden

Acetylcholine esterase 355
Acid growth theory, of auxin action 72
Actin-binding proteins 87
  BS-RNase 104
Adaptins 208
Adaptor proteins, of vesicles 165
Adipose tissue metabolism 201
β-Adrenergic receptor kinase 387
Agrobacterium rhizogenes, transformation by 72
AIDS therapy, blocking Ras function 338
Alternative splicing factor 452
Alzheimer's disease 140
Aminoacyl-tRNA synthetases 1
Anaerobic metabolism, in *E. coli* 310
Antibiotics
  synthesis 36
  discovery (Reflections) 195, 234
Antiparasitic drugs 305
Arachidonic acid cascade, in inflammatory cells 365, 369
Archaea, rRNA operons of 22
Asialoglycoprotein receptor 375
Asthma 365
Atherosclerosis 369
Auxin receptors 72

Bacteria, retroelements in 18
Bacteriophage T4, transcriptional enhancers 397
Bipartite motif, in nuclear targeting 478
Brain development and function, role of nitric oxide 81

^{13}C-NMR 5
Calciosomes 319
Calcium binding, in muscle contraction 53
Calcium binding proteins 98
  (Letters) 206, 207
Calcium stores, intracellular 319
Calmodulin 53
Calpain inhibitors, cell penetrating 150
Calreticulin (calregulin) 319
Calsequestrin 319
Cancer therapy
  Ras function blocking 338
  RGD mimetics 246
Capillaries, growth regulation of 268
Carbohydrate differentiation antigens 84
Carbon metabolism
  monitoring by ^{13}C-NMR 5
  in *Xenopus* development 229
Cell adhesion proteins 84
  RGD motif in 246
  in *Drosophila* 283
Cell–cell interactions 31
Cell-cycle regulation
  transcriptional control 430
  TPR gene family 173
Cell elongation, in plants 72
Cell–matrix interactions 31
Cell structure and composition 203
Cephalosporins 36
  (Reflections) 195, 234
Chaoptin 283
Chaperone proteins
  high temperature induction 135
  sequence motifs of substrates 159
  similarity to MHC proteins 357
Chloride ion transport, in cystic fibrosis 474
Chlorophyll *a*/*b*-binding proteins 181
Chloroplast antenna proteins, phosphorylation of 82
Chloroplasts, electron transfer chains in 129
Chromosome distribution 221
Citric acid cycle
  isotopomer analysis 5
  metabolons (Letters) 171, 172
Clathrin-coated vesicles 165, 208
Coagulation cascade, WKS motif 31
Coated vesicle dynamics 208
Coatomers 165
Cold adaptation, for oxygen transport 471
Collagens 31
  FACIT 191
Connective tissues 191
Crosslinking, by laser irradiation 323
Crystal formation (biological) 252
Cystic fibrosis, basic defect 474
Cytoskeleton
  actin-binding proteins 87
  interaction with mitochondria 63
Cytochrome b–c_1 complex of photosynthetic bacteria 207

Development
  in brain 81
  in *Drosophila* 81
  in Hepatocytes 427
  in *Xenopus* 229
Differentiation, role of stathmin 301
Dimerization, of DNA binding proteins 417
Disease
  concentration of calcium binding proteins in 98
  parasitic, treatment of 305
  role of endothelins 261
Disintegrins 246
DNA, multicopy single-stranded (msDNA) 18
DNA binding proteins 92, 291, 330, 428
  dimerization 417
DNA curvature 467
DNA–protein interactions
  sequence motifs for 92, 291
  in telomeres 378
DNA replication, role of papillomavirus E2 440
Down's syndrome 140

Early light-inducible proteins 181
Editosome 68
EF-hand motif
  and calcium binding 53, 98
  in clathrin light chains 208
Electron transfer chains 129
  in photosynthetic reaction centres 241
Elongation factors 408
  1a 87
Endothelins 261
Enhancer binding proteins 397, 423, 435, 440
Epstein–Barr virus, proto-oncogenes of 45
Escherichia coli
  anaerobic metabolism 310
  cell structure and composition 203
Evolution
  of amino acids 463
  of chloroplast proteins 181
  of EF-hand proteins 98
  of eukaryotes 46
    (Letters) 287–289
  of flavoproteins 154
  of haemoglobin 471
  of reaction centres 241
  of RNA 22
  of transcription 435
Extracellular matrix
  collagens in 191
  storage of growth factors 268

FACIT collagens 191
Factor VIII 31
Fascilin glycoproteins 283
Fatty acids, effect of low temperature 126
Fibroblast growth factors (basic) 268
Fibronectin 246
Fibronectin (type 1) motif 13
Flavoprotein reductases 154
Fodrin 31
Fusicoccin 72

G proteins
  affinity for ligands (Letter) 327
  membrane association 338
  in olfactory signal transduction 277
  and phosphoinositide turnover 261
